The science behind why it works

We eliminate odors with proven technology. Our success is due to the addition of a deodorant to our fragrance formulas. The science behind it all is simple: our effective deodorant attacks odor at the molecular level and leaves odor-causing molecules odorless. This allows our appealing fragrances to work their magic and for you to make an impactful impression on your customers.
Take a look at a sampling of our stock fragrances. You’ll find one featured from each fragrance family. Ask your service representative for a complete list of our quality fragrances, or visit us online.

Manage your fly problem with our Fly Control Service. We use a combination of safe, effective insect control products to establish a line of defense against the vile offenders. Whichever fly control service is suitable for your business, Aire-Master’s representatives will inspect all equipment each service period and make sure your dispensers or UV lights are in good working order by replacing cartridges, cans, and batteries as needed.

House flies are suspected of transmitting at least 65 diseases to people.
