FRUIT FLIES POSE A CONSTANT CHALLENGE

Flies, mosquitos and similar insects are, in most climates, a seasonal infestation. With the onset of cold weather they will disappear until the following spring.

Not Fruit Flies.

They are a constant presence, all year long—appearing whenever they can find the right conditions.

A persistent pest like the Fruit Fly needs a control solution that will prevent infestations around the clock and around the calendar. That’s why Paraclipse designed the Fruit Fly Patrol.™

PACKED WITH FEATURES TO PUT FRUIT FLIES IN THEIR PLACE.

- Highly effective combination of special UV light, attractants and trapping surface
- Unique Capture Cartridge™ provides continuous sticky surface and sex attractants
- Trapping system is environmentally friendly (designed for use in food handling areas, and meets applicable guidelines)
- Sanitary trapping surface captures insects and rolls them into the cartridge
- Research-proven Ultraviolet Lamp and Booster Reflector increases the outward reflective power of the UV lamp
- Easy to maintain, easy to clean
- Decorative, versatile design doubles as an attractive light fixture, suitable for public areas
- End of cartridge alarm

Paraclipse®
Manufactured in the U.S.A.

**Fruit Flies** are just waiting for a chance to swarm again.

Fruit Flies are everywhere. Virtually any environment that offers moisture can foster swarms of them. Add a bit of fermentation, sugars or citrus and the problem gets worse...fruit and produce, wine, liquor & beer, drains, mops, pouring caps in a bar well, even moist towels or linens will bring the pests.

Now you can fight back effectively without resorting to toxic chemicals by deploying the Fruit Fly Patrol™ from Paraclipse.

---

**Building an Insect Control System that’s irresistible to fruit flies.**

Conventional fly traps, bug zappers and similar devices are designed to attract a broad spectrum of flies, mosquitoes and other flying irritations. Fruit flies, however, respond to different chemical attractants and UVA light intensity than other insects.

The **Paraclipse Fruit Fly Patrol™** combines:

- UVA light designed to meet the intensity preference of fruit flies
- Chemical attractants designed specifically for fruit flies
- Visual decoys on the capture surface

It’s all contained in an attractive, sconce-style enclosure that can be placed in restaurants, nightclubs and other public spaces.

---

**OUR AMAZING CAPTURE CARTRIDGE™**

Like all Paraclipse Automated Insect Control Systems, the Fruit Fly Patrol uses our unique Capture Cartridge™ which lasts longer than competitive products, is clean, and easy to remove without touching insects.

The Fruit Fly Patrol™ product is certified for use in food service areas, and is both UL and CE compliant.
