

# Slips and falls are **costly**

Get peace of mind!

**Slips and falls** cost US businesses billions of dollars annually. Greasy floors are slippery floors. Now there is an easy way to safely and effectively restore traction to the greasiest floors and prevent costly accidents.

**Aire-Master** brings you *Step Safe*, our enzyme floor cleaner for tile and grout. This concentrated cleaner breaks down grease that builds up on hard surfaces. It is especially effective in kitchen areas around stoves, grills, and fryers. It's also great for high-traffic areas such as lobbies and entryways.

*Step Safe* is simple to use. Just a bucket and mop, squeegee, and stiff brush are all that's needed. Its benefit is in the enzyme-eating action of *Step Safe's* no-rinse, bio-enzymatic action that continues to work long after the floor is dry!

## Don't forget floors and walls!

**Aire-Master** can include a *Step Safe* treatment to our deep Floor and Wall Cleaning service for you. We'll remove built-up soil, stains, chemical residue, and grease from floors, grouting, and walls. Your floors are left clean and odor-free.
